WHY IT MATTERS

These technologies can help drivers avoid crashes with approaching traffic.

COLLISION PREVENTION FEATURES

Advanced camera technologies help Enclave detect collision threats. An available Forward Collision Alert warns drivers if they approach a vehicle ahead too quickly. The available Lane Departure Warning System alerts drivers when they unintentionally drift out of their lane. The standard Rear Vision Camera lets drivers see what's behind Enclave when it's in Reverse.

Dry road handling benefits include enhanced acceleration and torque to all wheels. Available.

- **StabiliTrak Stability Control with Roll-Over Mitigation** – Helps the driver stay on course. If the vehicle is not following the path being steered, StabiliTrak applies the brakes and/or adjusts the throttle to help the driver get the vehicle back on track. Roll-Over Mitigation senses rollover potential and applies brake pressure as needed to manage lateral tire grip.
- **Tire Pressure Monitoring System** – Continuously measures each tire's pressure and alerts the driver if there is a loss of tire pressure.

DURING
